HALT! SAYS CARRANZA

ONE STEP FURTHER BY AMERICAN TROOPS MEANS WAR FUNSTON PREPARES FOR EVENTUALITIES WITH HIS ARMY OF 50,000 REGULARS

Washington Holds Up the Reply to Carranza's Former Note, But Pershing Will Stay in Mexico--Mexican Army Said to Be Mobilizing--Last American Consul Withdrawn From Over the Border.

(By Associated Press.)
EL PASO, Texas, June 17.—Carranza having defied the United States by his advice to Pershing that any movement except retreat of American troops would be regarded as a hostile act, preparations were made along the border today for eventualities. Soldiers here remained in close quarters and street car service to Juarez was stopped. Efforts were made by United States customs officers to persuade Americans not to cross the line. The tension is noticeable on the Mexican side, where a number of civilians are arming.

It is reported from an authentic source that recruiting for the army is being pushed throughout the larger cities of northern Mexico.

(By Associated Press.)
SAN ANTONIO, Texas, June 17.—General Funston and staff have carefully considered the activities of outlaws along the border, but gave greater interest to the attitude assumed by the troops of the de facto government, to whose movements great significance was attached, according to the view of the staff.

The warning that crossing the border by American troops for any cause whatever would be the signal for attack by the de facto troops has not disturbed Funston.

The search into Mexican territory after the bandits will continue. Funston's 50,000 troops are disposed along the border so that swift action could be taken.

(By Associated Press.)
WASHINGTON, June 17.—The letter from Carranza warning that any movement of troops except in the way of retirement would be taken as a cause for hostilities will not change the purpose of the United States government to keep the Pershing expedition in northern Mexico or to prevent Pershing taking steps necessary for insuring the safety of his column and deal with the bandits threatening the border.

No advance further south is contemplated. It is not believed the Carranza forces are planning an immediate attack. No advice has been received from Pershing by the secretary of war regarding the Trevine warning, but General Funston reported that such warning had been given.

Diplomatic offices believe the warning was intended for home consumption and a political move to offset the activities of the anti-American element.

(By Associated Press.)
WASHINGTON, June 17.—Although the United States reply to Carranza's last note is completed, the sending is delayed by administration officials seeking detailed information of recent developments. Additions are probable.

The United States will reaffirm its purpose not to interfere in Mexican affairs unless forced by continued and aggravated attacks on American territory which have been reported.

(By Associated Press.)
SAN ANTONIO, Texas, June 17.—The arrival at Laredo of Consul Phillip Hanna today developed the fact that the United States had ordered both him and Consul Silliman at Saltillo to the American side of the river.

The withdrawal leaves the American government with no consular representative in Mexico outside of Mexico City.

(By Associated Press.)
LAREDO, Texas, June 17.—It is reported that more than 5000 Carranza troops passed Villadama, 100 miles south of here, going northward. This confirmed the report that Mexican troops are arriving from the interior.

(By Associated Press.)
LAREDO, Texas, June 17.—Texas rangers and armed citizens have been hurried to Isitas on the report that Mexican bandits were approaching. Few details are available.

Due to the vigilance of rangers the Isitas raid did not occur.

(By Associated Press.)
BROWNSVILLE, Texas, June 17.—Revival of bandit activity on the lower Rio Grande has resulted in vigorous action by the authorities, which is interpreted as presaging a determined attempt to check a recurrence of outlawry on American soil. Troops hereafter will endeavor to deal with the bandits on the American side of the boundary.

(By Associated Press.)

The Russian drive continues apparently without abatement and more aggressive than ever. It is reported that the number of prisoners is large and that an immense amount of war stores and other material were captured.

COWBOY CAVALRY FROM THE WEST

WYOMING AND MONTANA AR-RANGE FOR ENTERING THE SERVICE

(By Associated Press.)
BOZEMAN, Mont., June 17.—"Cow-puncher" cavalry as a feature of military training in western state institutions, notably state universities, will be undertaken with the opening of the autumn term.

At a recent conference between President J. M. Hamilton of Montana state college and Captain Tenney Ross, U. S. A., of the general staff, plans were outlined for the organization of a cavalry company at that college, and arrangements were discussed for spreading the movement among western colleges. The University of Wyoming, at Laramie, was among the institutions cited as particularly favorable ground for the project.

Captain Ross said that the United States government was prepared to supply the mounts needed and to look after their care and maintenance and that uniforms and equipment also would be furnished. It was only necessary for the school, he said, to provide stable room for the horses.

Whether the company is organized at Montana state depends upon the

The west drift on the 1450 has been advanced 400 feet and in the past several days bunches of quartz have been encountered.
